Deyrolle : Colouring from Nature before purchasing it in order to gauge whether or not it would be worth my time, and all praised Colouring from Nature:

0 of 0 people found the following review helpful. DISAPPOINTING, ReturnedBy jkemp This book is very disappointing. Very few good charts, and the pages to work with are bad unless you like wallpaper, zendoodle, and all the other junk out there. Almost no info on charts. When I see Deyrolle and other institutes, then your wonderful plates from all walks of science. I expect to see their work not childish scribbles. Front and back pics., paper is a little

thicker than most, very tightly bound. No education here, just disappointment. Returning.

From the beauty of the seabed, to the splendor of plant life and the diversity of birds, here are 60 pages of beautiful Deyrolle wall charts inspired by nature, accompanied by 60 pages of illustrations for you to color and bring to life. The Parisian scientific institution Deyrolle is famous worldwide for its unique collection of curiosities and commitment to science, nature and education. Its fabulous wall charts have been used in classrooms around the world and are treasured by both adults and children. Coloring the drawings inspired by them offers a much-needed moment of calm to de-stress and unwind.

About the Author Deyrolle is a world-renowned Parisian shop and a reference in the fields of taxidermy, entomology, and natural sciences.
