Kevin G. J. Freels : Conversations With...: Sideways Journeys with My Children before purchasing it in order to gage whether or not it would be worth my time, and all praised Conversations With...: Sideways Journeys with My Children:

Conversations with...By Barbara D SmithThis book is a wonderful, funny and touching look into real life, the interactions between parent and child, as they both see at the world from their own perspectives and interpretations based on their current life experiences. I loved it!

Those who have long believed nurture is stronger than nature, rejoice! Your proof is at hand. Kevin Freels and his wife Lynne tried for years to have a family, but when science could not help, they adopted two children from Taiwan, first their son Paden, and a year later, their daughter Emma. Over the years, these two children whose genetics and birth culture could not have been more different from their parents', have grown into what their friends and family have conceded is a perfect blend of Kevin and Lynne's personalities and character - Kevin's intelligence and warped humor, and Lynne's outspokenness and tenacity. Paden and Emma's views on life are at once amusing, insightful, absurd, and downright spot on. Over the years Kevin has recorded their conversations and sent them out via email and Facebook for friends and family to enjoy. I'm so pleased that he has gathered them all together into a book, as it gets harder and harder to track down a specific post to share with a friend or coworker. I hope you enjoy this collection of priceless gems - they are laugh-out-loud funny, and much easier to share with friends than posts from "Darn You Autocorrect."

About the Author Kevin Freels is someone for whom the word "sideways" describes well: a man who wears Hawaiian Shirts every day, leans towards the geek side of the Technology scale, and is consistently about 10 years younger than his driver's license would indicate. He lives in California with wife and two children, three dogs, and a handful of assorted tropical fish.
