CD Rahm : I.T. Confidential before purchasing it in order to gage whether or not it would be worth my time, and all praised I.T. Confidential:

Rahm has been there and lives to tell the tales of woe, hilarity, despair and the downright pigheadedness of a colleague or two or three. From the moment I saw the

author's name, I knew I had to read it. I am married to an IT professional and I was an administrative secretary for more than 15 years. I could relate to all of the stories told in the book. Highly recommended by me. You'll see yourself in many of them, an even if you don't, the book is very funny.0 of 0 people found the following review helpful. Funny and InsightfulBy Terry D BrittThis book was obviously written by someone who has lived the life of an IT professional. This writer's take on the personalities we interact with daily is absolutely hilarious. Outstanding!0 of 0 people found the following review helpful. I.T. ConfidentialBy cathy holmesYou want to know what goes on in the I.T. world? Well, the light, humorous and thought provoking moments that make this book one fun read. C.D. Rahm will take you to I.T with a smile.

If you could be a fly on the cubicle wall of an I.T. Professional.....someone would probably throw a stale bagel at you. But before they did, you would see what C.D. Rahm reveals in this tell-all book. At great personal risk to career and plastic pocket protector, Rahm takes us on a tour of corporate malaise, rampant confusion, dinner-plate-sized chocolate chip cookies, and lousy box lunches. Pulling no punches (except possibly the spiked punch from the disastrous office holiday party) he reveals everything: managers behaving badly, professional time-wasters, fast-food junkies, and the hygienically challenged. An I.T. insider, his is a world of technology for all, productivity for none. It is a place where the confused and frightened lead the overworked and clueless. This is where polyester slacks meet PowerPoint presentations, and budgets meet their doom. When network systems come down, I.T. professionals get up. And march straight to the vending machine. C.D. Rahm has been there, done that, and soiled the t-shirt. Now you can know what I.T. geeks know: That if you have a chip on your shoulder you have probably stuck your head into the wrong port. Whether you're a tech expert or you don't know your app from a hole in the ground, you will be astounded or at least mildly surprised by what you discover in I.T. Confidential.
