By Customer I love this book! Professor Cuttlefish was one of my favorite professors in Junior College. He brought biology to life every class period. I never realized he was also well versed in child development and early childhood education because this teaching tool is pure gold. I have read this book to my grandchild every night for a week and now she's going potty everywhere---the garden, the den, my kayak and just this morning she used the cat's litter box---I credit Professor Cuttlefish and his genius for this development.

By Greg Stone This is an hysterical/creepy book! I highly recommend it for adults and for children. Well, maybe not for children. Maybe for twisted children. No, definitely just for adults who were once twisted children. Yeah, that's about right.
