Although well done on the part of the author, I found the book over simplified when it came to discussing both military strategy and tactics. Would have like to have seen the publisher include more battlefield maps. Thought the book was an adequate review of global military actions during the modern era. 0 of 0 people found the following review helpful. Two Stars By BellaMartinez Not my

cup of tea.....0 of 0 people found the following review helpful. Another Gem From Jeremy BlackBy richardmcgahaDoes a great job of covering military history from 1775. The bibliography itself is outstanding and worth the price of the book alone. An essential starting point for anyone interested in modern military history.

This lucid account of military developments around the modern world begins with the American War of Independence and the French revolutionary wars and continues chronologically to the latest 21st century conflicts. It combines determinedly global coverage with thought-provoking analysis not only of the military aspects of conflict but also its social, cultural, political and economic dimensions and consequences. By placing familiar events alongside the largely unknown, the reader is forced to reassess the standard grand narrative of military history that rests on assumptions of Western cultural and technological superiority. It will be essential reading for students worldwide, whether studying modern military history, modern world history, history and international relations or war and society. This fully updated second edition includes: chapter introductions and conclusions to assist study and revision 'Voices of War' sourced extracts from the field of conflict case studies in each chapter to support the narrative and provoke discussion a 12-page colour map section and over 20 other integrated maps annotated references from the latest publications in the field

'Jeremy Black provides a truly global perspective on modern military history. This is the textbook we have been waiting for, generous in its perspectives, precise in detail and fascinating in its explanation.' - John France, United States Military Academy West Point, USA
