I have ridden much of the territory Paul describes but 40 years ago when the roads were more indifferent. His bike so unique and an adventure in itself. My advantage has been that he made me relive my adventures from those bigone days, including being joined by a dozen so called bikeys who turned out to be just ordinary folk. Any one considering purchasine this work might be well advised to get the audio version read by Paul himself0 of 0 people found the following review helpful. Save Your MoneyBy True ShoppeBORING! For such a journey on a crazy bike, surprised that story was very boring. Lots of swearing and vulgar talk not balanced by any great writing skill or even mildly interesting stories/adventures. At forty years old, a successful writer, husband and father, was Paul Carter happily enjoying the fruits of his labour? He'd want to be the first guy to ride around Australia on an underpowered experimental motorcycle that runs on used cooking oil, wouldn't he? Embark on a rollickingly, downright dangerous and often unhinged quest
