Humor is the best medicine 6 of 6 people found the following review helpful. Inspirational By Shopper I recently read this book and believe that everyone should read it; not just those who are battling breast cancer. This book allows you to see that you can survive, and that laughter really is the best medicine. I have had the privilege of knowing Michelle Lloyd and her fight against breast cancer. I have always looked at her as a role model, I wanted to be just like her. She convinced me to get a back surgery I needed, a surgery I was scared to death to have. Today I not only see her as a role model, but as an inspiration. She

fought through advanced breast cancer and lives her life in a way everyone should. I truly believe that reading this book will give you the courage to fight; it will show you how to find the humor in it all, the humor in healing.

Finding humor in your battle with breast cancer will not only give you sanity, it may even save your life.

From the Author Cancer is no laughing matter and I don't take it lightly. How you choose to take it on does. Staying positive helps me and finding humor in it softens the blow. Without being able to laugh, where would we be? I am an individual not a number. Numbers are for math books! About the Author Michele Lloyd lives in upstate New York with her family. She is married and has two children. She was diagnosed with advanced breast cancer at thirty-four years of age. She has been featured in the Poughkeepsie Journal and local television station about her battle with breast cancer and the importance of staying positive.
