It's quicker than doing a whole book size page, which I'm usually bored of by the time I get done. Not these though. The paper is a very stiff cardstock and the art is lightly colored lines. You will need fine tip pens or pencils though. I would buy more from this seller!22 of 22 people found the following review helpful. Love the challengeBy cstlouI love this book of postcards. Very detailed small work and requires ultra fine pens or very sharp pencils. I have been using a magnifying lamp for all of the designs. I wish they made other designs also. I've have given some as framed presents and everyone loves them. I think I will buy another

one as soon as they are back in stock for myself!19 of 19 people found the following review helpful. Beautiful but small designs.By lkiser11To be fair, these are beautiful postcards. The designs are nice, and the paper is very sturdy cardstock. However, at least half of the designs are too small/detailed for my liking. I like lots of details and love using fine point pens, but I don't know if I have any pens with points small enough to successfully complete some of these pictures. Some people may really like them. I would prefer the design to be a bit larger. I would definitely buy others from Lark Crafts, just to give them a try, as I love these designs. Hope they come out with more to my liking.

Color them in . . . send them out! This attractive drawing book features 20 cards all ready to color. When you're done, tear them out and send them to a friend—or frame them at home.
