If you live around drivers that suck, such as Cincinnati, Chicago, Detroit, Los Angeles, Miami, St. Louis, and pretty much every other city you care to mention, this book will have you laughing throughout. Lots of funny diagrams accompany the sharp wit of the text. If you want to convert the stress of road rage to something that is more light-hearted and relaxing, then this book is the thing you want.

"There are all sorts of ways to improve your chances of passing your driver's test other than the overrated strategy of being a good driver." is a typical opener. Of course, the point of the book is not to actually HELP the son or daughter who is coming up on driving age, but to help the relationship, a large part of which is to help the parent relax a bit about the dangers of a child behind a wheel. Humor is the only really good antidote to these fears, and this book provides. I heartily recommend it for all parents, especially uptight ones.

I bought this for my newly licensed 17-year old brother who hates reading. When he found a book under the christmas tree he thought I was crazy. But once I told him about the premise of the book he loved it and reads it over and over again. This is funny for all ages. The scenarios, tests, and driving suggestions are hilarious. I highly suggest getting this book if you are looking for a good laugh.

The Bad Driver's Handbook: Hundreds of Simple Maneuvers to Frustrate, Annoy, and Endanger Those Around You debunks the myths of the "good" and "bad" driver by describing in detail the liberating truths about driving that have long been suppressed. Novice and experienced drivers—along with those who are bewildered by the utopian fantasies about driving found in the typical DMV handbook—will find all of their questions answered by authors Larry and Zack Arnstein, who offer comical commentary and tongue-in-cheek observations on such bad driving techniques as: Bribes, Threats and Other Secrets to Getting Your License Intimidating Pedestrians Making Your Car Louder Turn Signals: Why Give Up the Element of Surprise?
