But if these examples are the "best," then "medical humor" is not often funny.2 of 2 people found the following review helpful. Priceless for anyone familiar with American medicine education, research, or practiceBy GBsI love it. It is a compilation from multiple sources. It has the Pediatric Intern Screening Test (PIST), ala Denver Developmental Test, which includes such milestones as "Can throw pager overhand." and "Can dodge an admission." It covers all phases of a physician's career, e.g. Research, and getting a study through the IRB by finding out which committee members have a drinking problem. Medical School, and how to pick a specialty by which candy bar you like the most or by which body fluid offends you the least. He's even isolated the virus that can give teething

babies a mild fever. It is in the shape of a teething pretzel!

Available in the US, Canada, Latin America, and South East Asia (except Japan) only. Not distributed by LWW in Europe.
