**Jeffrey Armstrong : The Binary Bible of Saint Silicon** before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Binary Bible of Saint Silicon:

1 of 1 people found the following review helpful. For the computer geek in your life By M. M. C. Lambert A very amusing and somewhat irrelevant book for the computer geek in your life, or just those who enjoy a bit of computer humor. I once posted the "Keyboard Prayer" on the bulletin board at the hall where my prayer group met. They were very amused. The Keyboard Prayer Our program, who art in memory "hello" be thy name Thy operating system cometh thy commands be done at the printer as it is on the screen Give us this day our daily data and forgive us our errors as we forgive those whose logic circuits are faulty And lead us not into frustration but deliver us from power surges For thine is the application, the algorithm and the solution looping forever and ever Amen The worst part of it is, I only read it a couple of times, 15 years ago, and I still have it memorized. Scary! 0 of 0 people found the following review helpful. Four Stars By David Medinnus Silly but fun! 1 of 1 people found the following review helpful. Hilariously funny. By Customer Jeffrey Armstrong used to attend various computer shows dressed as a southern preacher, hairspray and all, with a small IC glued to his forehead. He could deliver flawless sermons on whatever related subjects that came up in conversation. The book is at least as good as his personal performances. Maybe it is time for "Another Binary Bible"? Reverend Armstrong, are you out there?

Jeffrey Armstrong, aka Saint Silicon, is the founder of C.H.I.P., the Church of Heuristic Information Processing, the world's first Computer Religion, the Hunt and Peck Method of Salvation, the world's first user-friendly religion. Like

the prophets of old, he came from humble origins in the Midwest. An apocryphal story relates that his first computer came with a Loser's Manual. He worked for years in the Data-dungeons of Silicon Valley, toiling in sales and marketing positions. Finally, after years of austerity and penance, he bought a Macintosh (for the Macrighteous shall inherit the Earth). And because he paid full price, great things were destined to happen. Late one night as Jeffrey worked on a word-processing file, lightning struck the satellite dish on his roof. When he awoke, the "Keyboard Prayer" was on the screen in 18 point Times Roman along with the command to write the Binary Bible. Thus he was "Bored Again" and was renamed and saved as Saint \$ilicon. He immediately quit his job and retired to a cave in the Santa Cruz mountains and began writing The Binary Bible as it was dictated to him by the Giver Of Data, G.O.D. And so a ray of hope came FORTH for all those with a Terminal Illness, for all who suffer from Data Distress, the D-based and D-filed who have lost their beloved Data. Now a great revival is sweeping the world. From that moment on it was GIGO- Garbage in Gospel Out, or to quote P. C. Barnum: "There's a Seeker Born Every Minute." and in the end, everything will be Right Justified!!! --- from book's back cover
