Exactly 800 years ago, Magna Carta established the right not to be thrown in the Tower of London for being slightly irritating, which is the closest the Brits have ever got to a written constitution. But come on! Things have moved on since King John. Isn't it time they had another bash at setting down a few laws and principles for everyone to live by? Isn't it time they knew how to queue properly, how to banter within the limits of decency, how to handshake in a regal

fashion, how to appropriately and committedly observe the weather, and how to competitively own pets? It will no doubt confuse the Taliban, perplex Americans, and move the French to shrug their shoulders and say nothing, but for the good people of the UK, this first draft of the British Constitution sets out and celebrates the very best bits of being British.
