Kate Charlesworth, John Gribbin : The Cartoon History of Time before purchasing it in order to gage whether or not it would be worth my time, and all praised The Cartoon History of Time:

0 of 0 people found the following review helpful. Astoundingly Cool!By OrchardsLoved the graphics! the enlightening journey featured many concepts that I am on the verge of comprehending. A very fun read.0 of 0 people found the following review helpful. stupendousBy emveejaywonderful challenge for me.2 of 2 people found the following review helpful. A welcome returnBy Charlie T.Brilliant to see this back in print after so many years. And it still stands up at least as well as Hawking's book! But much easier to read. I identify with the chicken.

What is time? How did it begin, and where will it end? Is time travel possible? How does the universe expand, and where do black holes come from? Junior Chicken and Alexis, the Quantum Cat, examine these and other extraordinary

concepts, explaining the substance of Stephen Hawking's *A Brief History of Time* in terms that "even a chicken can understand." This humorous graphic novel–style exploration of cosmology and quantum physics will amuse and enlighten curious folk of all ages. Author John Gribbin received his PhD in astrophysics from the University of Cambridge and has written more than 120 popular science books, many of them science fiction. He swears on Einstein's socks that every word in this book — fantastic as it seems — is true. Artist Kate Charlesworth's extensive and diverse career in illustration includes a cartoon strip for *New Scientist*, "Life, the Universe and (Almost) Everything."
