Frank J Fleming : The Chronicles of Dubya Volume 1: The Defeat of Saddam before purchasing it in order to gage whether or not it would be worth my time, and all praised The Chronicles of Dubya Volume 1: The Defeat of Saddam:

This kind of humor is hard to pull off; it tends to get mean, stupid, lame, and/or repetitive. Instead, Frank J. manages to keep it funny, entry after

entry:=====Rumsfeld laughed heartily, striking fear in the hearts of all the reporters. "After Iraq is obliterated, we will turn our vengeance on the UN and all those unfaithful to America. Most of Europe will be strip-mined and Canada changed into a prison camp." "So all those protesters who said that America has imperialistic intentions..." "Were absolutely right...and will be killed."===== "...Now, Mr. Daschle, what does one have to do to become a senator?" "I think it's a good idea to first become a lawyer. That helps erode away your soul, which is an obstacle in politics. Then I say you need to act concerned about a lot of things and talk down to people. And it's good to have a believable smile." Daschle then smiled, causing the class to cry. "Make the scary man go away!" cried one girl.===== [French President Jacques Chirac] turned back to the press. "Now, where was I? Oh yes... Silly little nations! How dare you defy France, the pinnacle of humanity?! We're too smart and sophisticated to fight in any wars. We just surrender and wait for everything to turn out all right in the end. America and their infantile talk about good and evil, morality, and justice will mess up the sophisticated business ventures we have with Saddam."===== "Anyway, on to the tech demos." On a screen behind [National Security Advisor Condoleezza Rice] appeared a picture of a small electronic device with a drill. "This is a special projectile that homes onto a target's head, slowly drills into his skull, and then explodes. Honestly, it offers no tactical advantage over just shooting a target with normal bullets, but we all thought it was pretty cool and can't wait to see it work on some actual enemy combatants. By the way, if someone has a use for a dozen headless monkeys, talk to me after the press conference." "Wouldn't a weapon like that violate the Geneva Conventions?" asked a disgusted-looking reporter. "The what?" Rice asked, appearing confused....===== "So there is nothing that the Democrats can do to keep us from getting our tax cuts," Ari [Fleischer] announced to the press. "Nothing can stop us." "Nothing at all?" asked a reporter. "Well, nothing...unless they fled to Canada," Ari said. "But that would be a bold move, and they would never do it. Instead, they'll stay here in DC, where there is soon going to be a big march of the AAGO, the Association of Angry Gun Owners." "But isn't it illegal for people to march around DC carrying guns?" "Bah! Laws are for those who don't have guns!" "Is this all a trick so that you can slaughter the Democrats en masse after they have left US soil?" asked a reporter. Suddenly darkness surrounded him, and he burst into flames. "New rule," Ari announced. "If you spontaneously combust, I don't have to answer your question." "Why is it that when it seems a reporter is getting close to the truth," one reporter asked, "he is then killed by some demonic force and...?" A thought struck the reporter, and he suddenly became frightened. "Forget what I was just saying; I have a different question. Uh...does the president like kittens?" "Yes, he finds them cute and easy to throw."===== And so on. Buy it. ..bruce..0 of 0 people found the following review helpful. Fake, but accurate!By D. GonzalesMany people fail to understand that the presidency involves a lot more than what you see on the news. Many of the presidents most important tasks are done far away from public view. What Mr. Fleming has done with this book is to strip away the veil of the public facade and show us what the presidency involves on a day-to-day basis.It is thanks to George W. Bush that we no longer have to fear the specter of Cyber-Lenin or the haunted portrait of Mao Zedong. It is Bush's courage and strength that allowed him to find and wield the mystic blade Crat-cutter and defeat the demon O'Yama, preventing him from gaining the democratic nomination in 2004. The only mystery of Presiden Bush's administration Mr. Flemming's crackerjack journalism could not uncover was the identity of the mysterious Rumsfeld Strangler. Who was this shadowy figure who strangled hippies and left indecipherable messages like "I, Donald Rumsfeld, personally strangled this hippy."? The world may never know.In short, this book has quickly become one of my most prized possessions and will be an heirloom to pass down to my decendents. My hat is off to you Mr. Fleming and I eagerly await Vol II.8 of 8 people found the following review helpful. Laugh out loud funnyBy Michael FisherI had read the posts that make up the book as they were being written over the last three years and I waited eagerly for each and every installment of "In My World". They're laugh out loud funny.FrankJ pokes fun at every political figure using the caricatures that their detractors believe. So for instance, Bush just wants to play Mario Kart, Rumsfeld wants to strangle hippies, Chirac wants to surrender to anybody and Daschle cries while Karl Rove is the mysterious, hooded figure who emerges from the shadows to foretell what has been prophesied.And, as FrankJ says in the first review, it's absolutely hysterical re-reading those old posts.One word of warning, don't read this book in public as it creeps people out when strangers are sitting by themselves laughing uncontrollably. I'm a little depressed because I was planning on reading it on the bus, but I didn't want to get kicked off so I just read it at home and laughed my head off.Again.

The dumbest book ever written about the Bush administration! Remember when President George W. Bush had to deal with an inter-dimensional alien warlord? When Condoleezza Rice attempted an unsuccessful coup? When an ancient Japanese demon entered the Democratic Presidential Primary? When a serial killer known as "The Rumsfeld Strangler" prowled the streets of DC? If not, then you need this book so you can brush up on your history. From the acclaimed political humor series "In My World" off of the hit blog IMAO comes a fake but accurate account of the Bush administration from the build-up towards the Iraq war to the capture of Saddam and all the misadventures in

between.
