**Mr. John Martin : The Cold Civil War: Our Divided House is Falling** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Cold Civil War: Our Divided House is Falling:

"The Cold Civil War: Our Divided House is Falling," takes an honest look at the divide we see in America today. It lays out our political differences as a nation, in terms of male and female perspectives. If you are politically correct,

this is not the book for you. But if you don't mind a few genital jokes, you will get a lot out of this book. Though I use a nice dose of humor to illustrate my conclusions; the consequences of those conclusions could be nothing less than ruinous for our nation. America is already coming apart at the seams. We all agree on this. The time has come to lay down our petty differences. We must end the days of false debates and work together to solve our problems.
